

R7 Cap/Base

Ruby Infrared heat lamp

- High Efficiency**
Up to 95% of Energy Converted to IR Radiation
- Long Life**
Typically Greater Than 5,000 Hours
- Fast Response**
Typically < 1 Sec. to Reach 90% Output
- Output Maintenance**
Typically < 10% Drop in Output Over Life
- Designs**
Custom Lamp Designs Available

Type	A(mm)	B(mm)	C(mm)	D(mm)	Wattage	Voltage	Colour
H8565300	85mm	65mm	15mm	125mm	300w	220v	Ruby
H8565500	85mm	65mm	15mm	125mm	500w	220v	Ruby
H8565900	85mm	65mm	15mm	125mm	900w	220v	Ruby
H125991200	125mm	99mm	20mm	160mm	1200w	220v	Ruby
H185991500	185mm	170mm	20mm	160mm	1500w	220v	Ruby

Used in various physical therapy devices, Ruby infrared heating lamps are used to generate beneficial infrared rays for the human body, while reducing glare and providing protection for the human body.

Mainly used for infrared lamp tubes with reflective layer (heating), SMT industry professional lamp tubes (heating), color steel plate production line lamp tubes (heating), glass coating drying lamp tubes (heating), automotive paint lamp tubes (heating), crystallizer lamp tubes, vacuum molding machine lamp tubes, heat shrink packaging machine lamp tubes, heater lamp tubes, food baking furnace lamp tubes, halogen lamp tubes, chicken oven lamp tubes, and incubator lamp tubes, Printing and dyeing infrared sampling machine lamp tubes, pre shrinking machine lamp tubes, base drying machine lamp tubes, paint room lamp tubes, printing fast heating and drying lamp tubes, etc

The most common lengths and wattages are listed, please tell us should you require a different length.
